

the WEATHER

Weather is the art of knowing
or else, you could be caught out in the rain!

How different
animals behave,
how trees and plants sway,
how the air feels on your skin
and how the sky looks at
certain times of the day are all important
and sometimes more reliable than any
computer generated forecast!

here's an old saying, found out for yourself if it true:

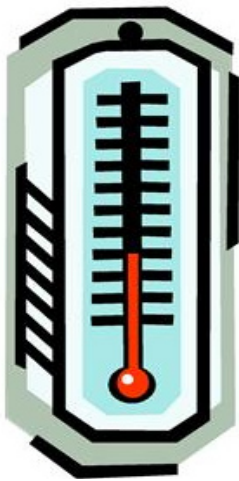

**“Red sky at Night, Sailor’s Delight.
Red sky in Morning, Sailor’s take warning!”**

What is it predicting: _____

the WEATHER

Today's Date: _____

Today's Weather is: _____

the Temperature is: _____

It feels like: _____

The Animals were: _____

The Plants / Trees were: _____

I Predict: _____

the WEATHER

TIME	Temperature	Weather Conditions

Rain/Snow Accumulation: _____
