

TO MAKE BOX: Print off onto cardstock and color in your box.
 Cut out the box - along the outside edge only.
 Then on all of the inside lines - fold them in towards the back side/blank side of the box.
 apply glue to shaded areas with a glue, glue stick - (you can also use tape to attach it)
 First apply glue the A tab, and press onto the back side of the front of the box.
 Then apply glue to the B tab and press into place on the back side of the front of the box. (carefully reach in through the top of the box (with a ruler) to press tab B into place)
 Once dry - go ahead and place your cards inside and close the last tab over the top tucking it inside.
