

Snow Angel Ornaments

INSTRUCTIONS: Color or Using glitter paint, paint* on some sparkly snow onto your angel. Once Dry, Cut out and hole puch where there are grey circles on the angel. Add some ribbon through the holes and tie a bow. Now tape on a piece of ribbon to hang your angel from.

*I don't use basic glitter...I find that when you use a fabric paint glitter the glitter doesn't rub off as much. For the Angel pictured, I use Diamond and Silver metallic Tulip Glitter Paint. Plus some silver curling Ribbon,

SUGGESTION: First make a small cone shape out of cardstock or a paper plate. Tape or staple into shape. Attach it to the back of your angel. Trim any extra off the cone that shows above or below the angel. Now you have a matching Tree topper. A hanger isn't necessary for this idea. However, the angel pictured does have a cone on the back side... plus a hanger...I painted the cone with glitter too and hung it on the tree for a 3D Angel. The hanger is attached with a hole puch through the top part of the cone.
